Progress in Ultrafast Intense Laser Science: Volume IV

By -

Springer. Hardcover. Book Condition: New. Hardcover. 266 pages. Dimensions: 9.5in. x 6.4in. x 0.8in. It is a great pleasure that we are now publishing the fourth volume of the series on PUILS, through which we have been introducing the progress in ultrafast intense laser science, the frontiers of which are rapidly expanding, thanks to the progress in ultrashort and high-power laser technologies. The interdisciplinary nature of this research field is attracting researchers with different expertise and backgrounds. As in the previous volumes on PUILS, each chapter in the present volume, which is in the range of 15-25 pages, begins with an introduction in which a clear and concise account of the significance of the topic is given, followed by a description of the authors' most recent research results. All the chapters are peer-reviewed. The articles of this fourth volume cover a diverse range of the interdisciplinary research field, and the topics may be grouped into four categories: strong field ionization of atoms (Chaps. 1-2), excitation, ionization and fragmentation of molecules (Chaps. 3-5), nonlinear intense optical phenomena and attosecond pulses (Chaps. 6-8), and laser solid interactions and photoemissions (Chaps. 9-11). This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN, etc.

Reviews

This kind of pdf is everything and made me seeking ahead plus more. It is probably the most amazing ebook I have study. I am quickly can get a enjoyment of reading a composed pdf.

-- Florence Rutherford DDS

Definitely among the best ebook I actually have possibly read through. It is really simplified but unexpected situations in the 50 % from the publication. You won't truly feel monotony at any time of the time (that's what catalogues are for concerning in the event you ask me).

-- Jerald Champlin II
